# ABOUT The Application

Our urgency stems from a simple truth:  
not everyone can afford to buy instruments  
for short-term needs.

Myloides connects musicians with instrument  
owners in one streamlined platform

# THE FRAMEWORK we used

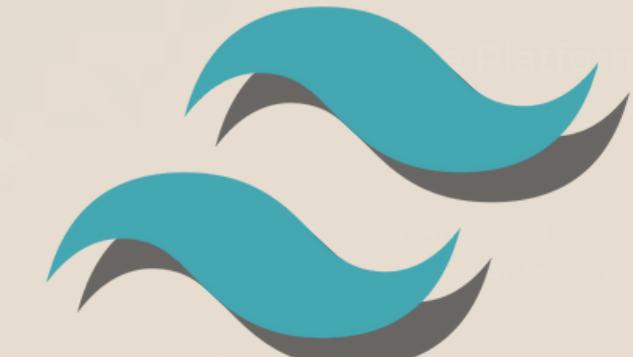

We use two framework to build this website :

1.

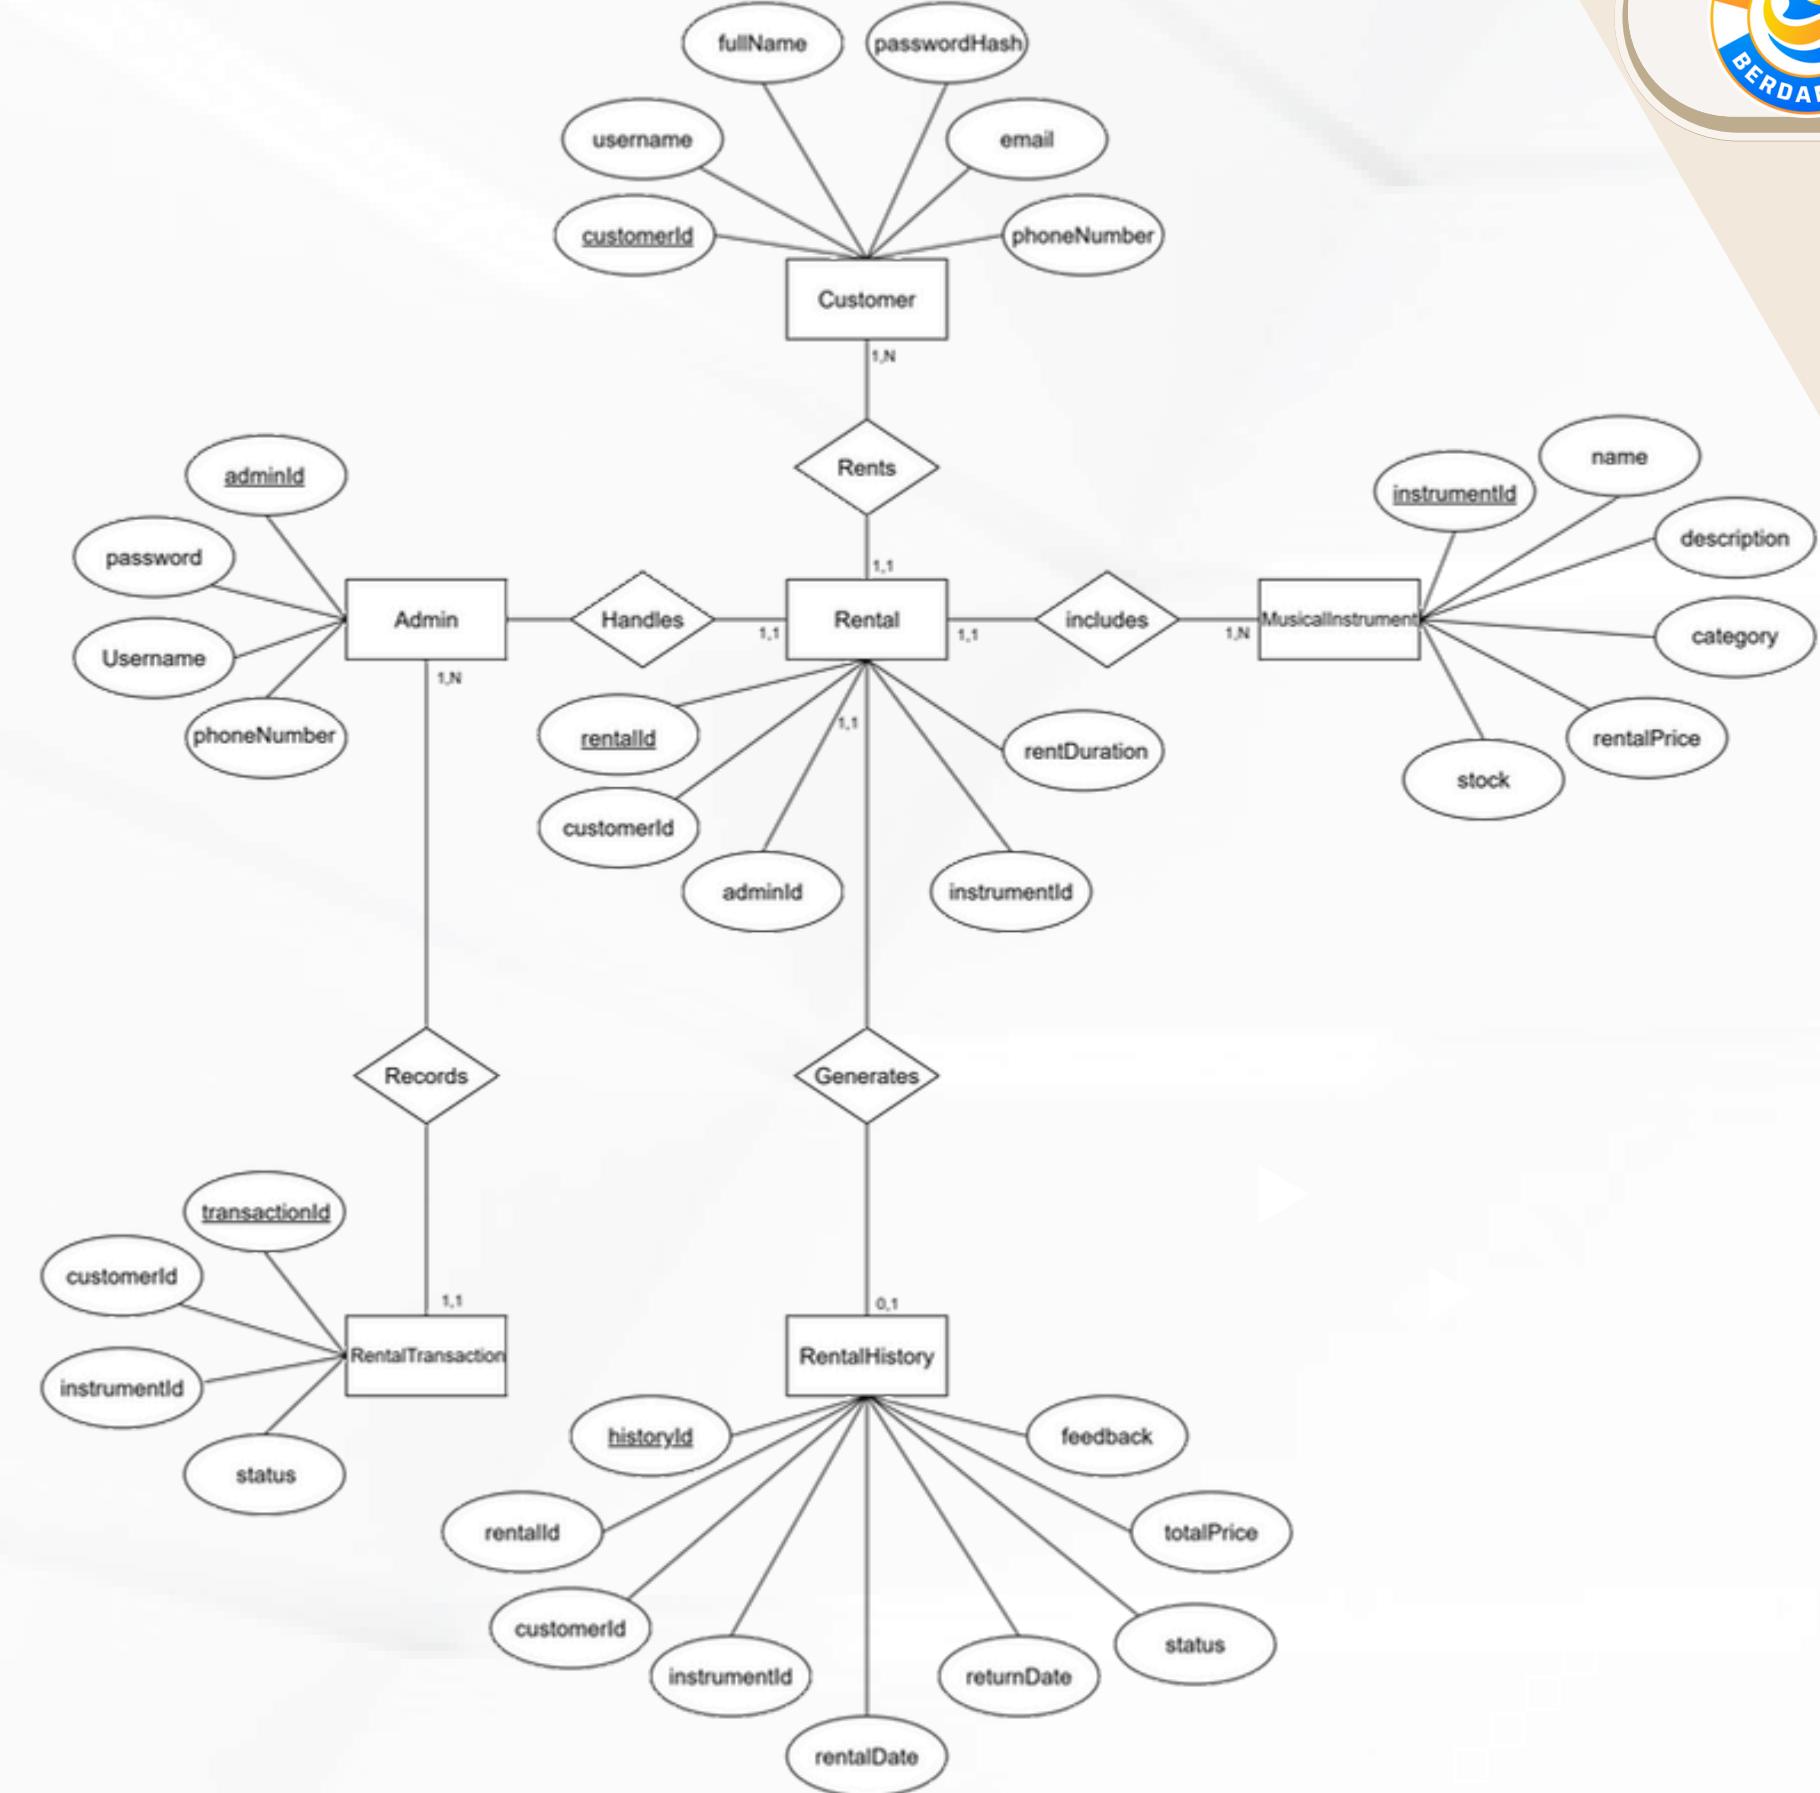

2.

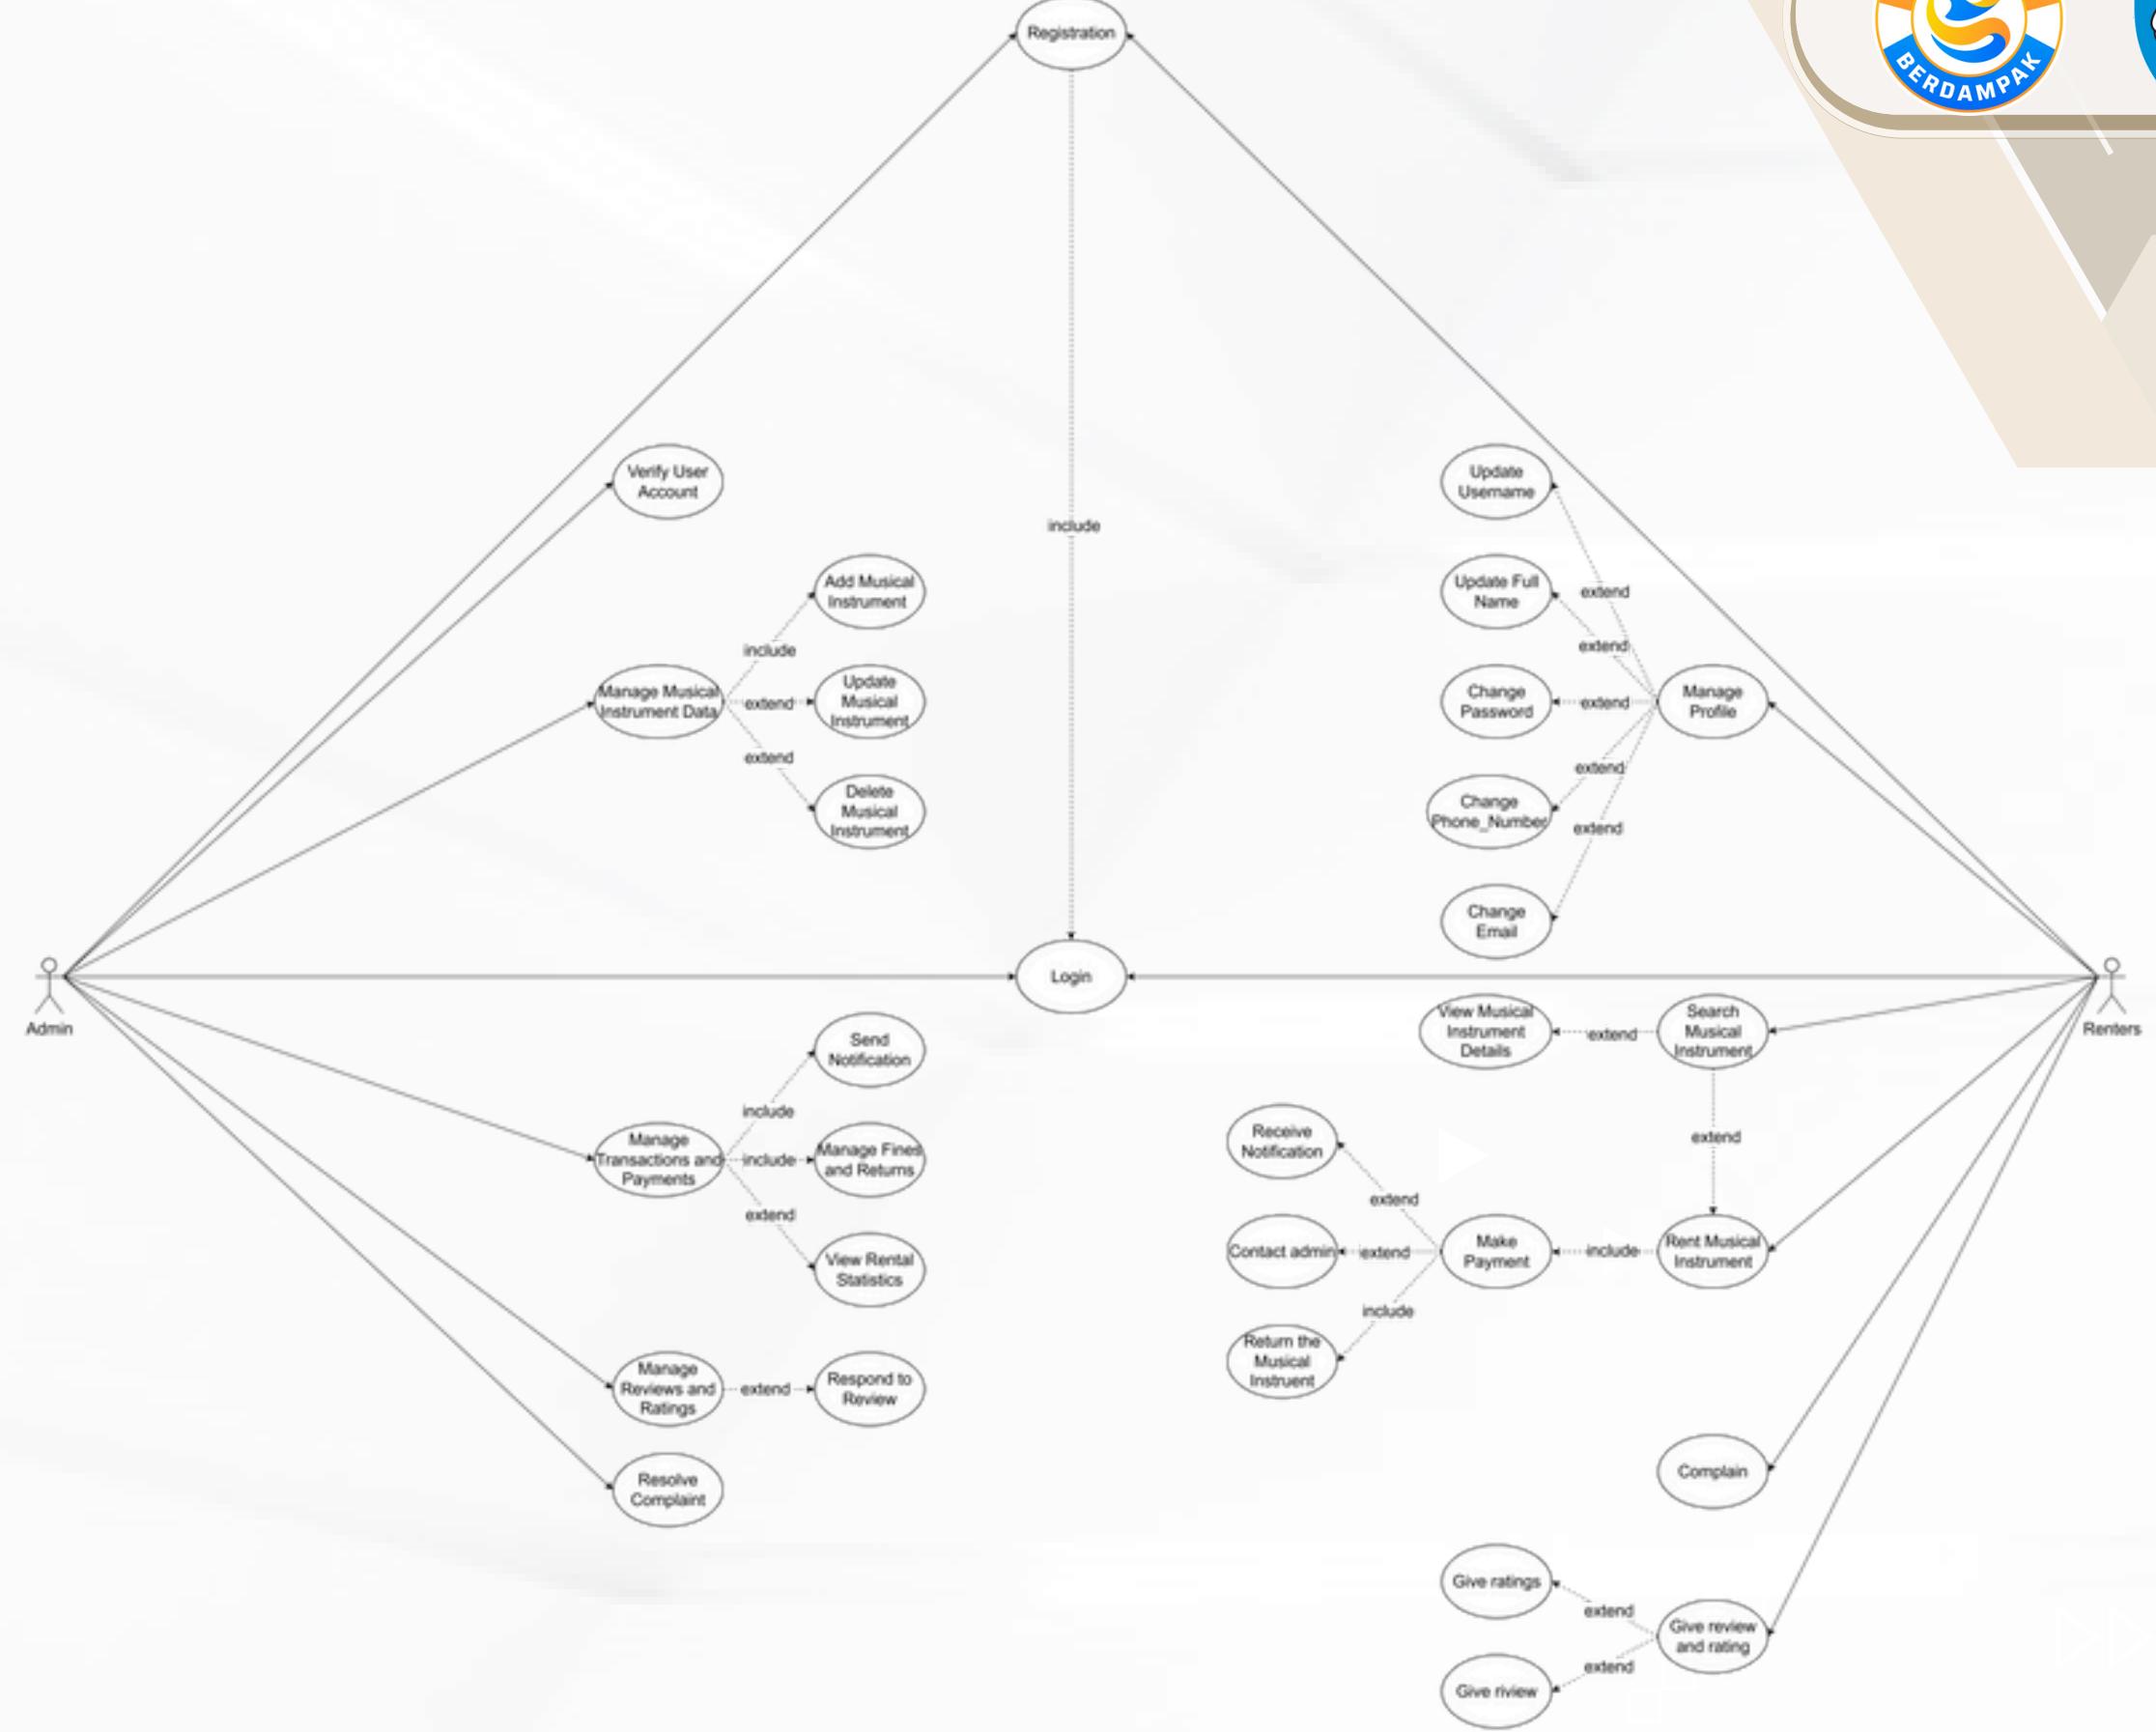

# ENTITY RELATIONAL DIAGRAM

The diagram illustrates the structure of the Entity Relationship Diagram (ERD) for the **MyLodies** system

# USE CASE

The Use Case Diagram highlights the main features and actor relationships within **MyLodies**.

# TESTING RESULTS

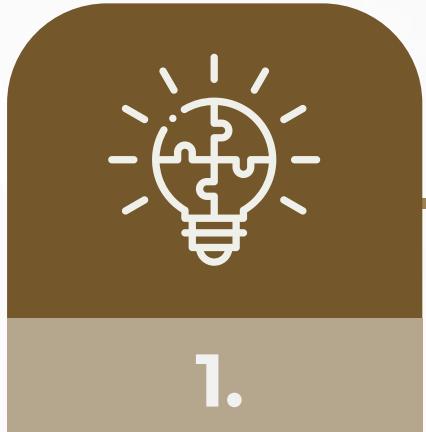

The table below summarizes the test results performed through Selenium to ensure application functionality.

Project: mylodies		Project: mylodies		Project: mylodies	
Tests	+	Executing	+	Tests	+
<a href="#">Search tests...</a>		<a href="#">Search tests...</a>		<a href="#">Search tests...</a>
